-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Prosecution reopened

Prosecution is reopened in this application after a decision by the Board of Patent Appeals and Interferences for consideration of the prior art reference Villani (US Patent No. 5,848,989), as discussed below, which indicates the nonpatentability of the appealed claims. The prosecution is reopened as per CFR 1.198 for the consideration of matters not already adjudicated. See MPEP 1214.04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 60, 61, 63-68, 70-72, 74-79, 113, and 114 are rejected under 35 U.S.C. 102(e) as being anticipated by VILLANI (US Patent No. 5,848,989). Villani discloses an access port to be implanted into a patient's body including an upper body part 2, lower body part 3 attachable to the upper body part (see fig. 2), a self-sealing unitary septum 4 (col. 4, ll. 29-31) between the upper body part 2 and the lower body part 3, the body parts made of implantable biocompatible material (col. 4, ll. 1-5), a reservoir 8 defined by the body portion and located between the septum 4 and lower body part 3, an outlet 9, an entry site 7 located on the upper body part 2 disposed opposite the outlet 9 and configured to permit the insertion of a guidewire or stylet 13.

Art Unit: 3767

The disclosed entry site shape and size and position in relation to the outlet 9 would permit the insertion of a stylet or guidewire (see fig. 3 where a stylet 13 is inserted within the entry site 5) through the body portion and into the outlet, and such would be recognized by persons of ordinary skill in the art. The outer surface of the septum 4 forms a portion of an exterior surface of the device, as seen in fig. 3. The prior art device also includes an access site 5 on the upper body part 2 that extends away from the reservoir substantially perpendicular to the direction extent of the outlet 9 and the entry site 7. See figs. 2, 3, 5, and 6 where the vertical side of access site 5 extends substantially perpendicular to the horizontal side of the outlet 9 and entry site 7. The unitary septum 4 is comprised of first and second portions that provide access to the reservoir via the entry site 7 and access site 5. A catheter 12 is attached to the outlet 9 (fig. 3).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Hayes at (571) 272-4959.
